

PLASTIC CONVEYOR BELTS

Thermoplastic elastomer belts

TOP-Characteristics

- Approved for use in food processing
- Low costs, low maintenance
- Hygienic design
- Resistant to cuts and abrasion
- Durable and long-lasting
- Easy to clean

VOLTA polyurethane conveyor belts are extremely hygienic thanks to their smooth, cut and abrasion-resistant surfaces. Tension members are not used so liquid, bacteria and similar substance intrusion cannot occur. The product is fully resistant to water, oil and grease. The belt properties ensure that no fragments can break loose and get into food products, so the quality and shelf life of the final product is increased and waste is reduced.

INDUSTRIES

Fruit and vegetables | Baked goods | Dairy | Meat and poultry | Animal feed | Fish and seafood industry

EQUIPMENT

Bottomside available in smooth, structured or fabric versions

SPECIAL VERSIONS

In various thicknesses and hardnesses | Non-stick surface | Perforated | With aramid fibres | With cleats | With gear teeth on the running side (positive drive) | With profiles
